Biodiversity and the implementation of the Global Biodiversity Framework in multi-functional biodiverse agricultural landscapes

When: 10:30-12:00 (CEST), 21 November 2024

Where: <https://us06web.zoom.us/j/87529364925>

Moderated by Geert van der Meer, technical consultant and project manager at reNature

Netherlands Enterprise Agency

WEBINAR PROGRAM

Maxime Eiselin

Senior Expert International Biodiversity Policy at IUCN NL

Keynote 1: Agriculture and the implementation of the Global Biodiversity Framework

Abstract: Agriculture is key to the Global Biodiversity Framework, promoting sustainable practices that align food production with biodiversity conservation. What is the role of our food system in achieving the goals and targets of the Framework that the worlds agreed on? And what where the relevant outcomes from CBD COP16?

Sara Scherr

President & CEO at EcoAgriculture Partners

Keynote 2: Integrated landscape management: a pathway to biodiversity in multifunctional agricultural landscapes

Abstract: In this video, EcoAgriculture Partners will introduce Integrated Landscape Management, a community-led approach that unites diverse partners to restore and manage biodiverse agricultural landscapes. We will explore the key components and processes, highlighting how farms benefit from and contribute to healthy landscapes through nature-based solutions, particularly in areas where agriculture is the dominant land use.

Olivia Rasolomampianina & Ivan Semjen

Catholic Relief Services, Qimpexx Agri Sarl

SDGP Experience 1: Cinchona-based agroforestry systems : a NBS for developing resilient communities and landscapes around protected areas in Madagascar

Abstract: The presentation shows how cinchona-based agroforestry supports communities near Madagascar's protected areas, enhancing livelihoods and landscapes. Qimpexx, CRS, and the Ministry of the Environment strengthen producers' capacities and integrate them into sustainable value chains, emphasizing partnership expertise, effective monitoring tools, and strong organization, linking nature-based solutions to infrastructure and education.

Kwame Sekyere & Evelyn Nartey

Project Manager, Tropenbos Ghana; A member of the Ghana National Association of ADR Practitioners

SDGP Experience 2: Tackling land tenure issues to boost sustainable, climate-smart cocoa agroforestry in Ghana

Abstract: The presentation highlights how cinchona-based agroforestry supports communities near Madagascar's protected areas, sustaining livelihoods and landscapes. Qimpexx, CRS, and the Ministry of the Environment strengthen producers' capacities and integrate them into sustainable value chains, emphasizing partnership expertise, monitoring tools, and organization, linking nature-based solutions to infrastructure and education.

SDGP KNOWLEDGE EXCHANGE WEBINARS

Climate change

Strategies for adapting and mitigating effects of climate change by regenerative agriculture

17 Oct 2024

Inclusive agro-ecological practices for women and youth

20 Feb 2025

An M&E framework for measuring the impact of interventions addressing climate change

15 May 2025

Biodiversity

Biodiversity and its implementation of the Global Biodiversity Framework in multi-functional agricultural landscapes.

21 Nov 2024

The potential of carbon and biodiversity credits

20 March 2025

Examples of NbS for agriculture and forestry

19 June 2025

Rules of the game

- A. All participants are muted during the webinar.
 - B. Questions can be posed through the chat.
 - C. All questions will be answered and sent to the participants.
 - D. Kind request to complete survey at end of webinar.
 - E. The webinars will be recorded.
-
